Strategic and goal oriented full stack web developer with a passion for efficient, reusable and durable code that provide a complete solution for any given problem. I've prototyped an e-commerce app, complete with back-end API's and payment methods for a client, prototyped a mobile game built with web technologies and am a member of a local start-up.
Personal Interest include AI, drones, web graphics and hybrid apps made with web technologies.

William Amanabo

Full Stack Web Developer

Work History

2019-09-current

Freelance Web Developer

- Joined a start-up with interest in money handling and investments.
- Built an e-commerce app for a client using react-native, mongoDB and NodeJS. Used Materialize and Photoshop for design and logo.
- Prototyped a PWA web game using BabylonJS, Preact and firebase.
- Protoyped a browser file system with vanilla JavaScript and Indexed Db. Used Bootstrap for UI and UX design.
- Lead a local business project that produced a self-sustaining, exponentially growing and cost effective (for both company and buyers) marketable product.
- Built a Portfolio website for a client using wordpress and PHP
- Posted projects and contributed on Git-hub.
- Determined coding requirements for site creation, including e-commerce capability and specialized scripts
- Created eye catching and functional digital design concepts across various platforms to strengthen company brand and identity
